A) For items (1-6), read the following text carefully, and then choose the correct answer from A, B, C or D to complete each of the following sentences.

Sleep is very important for our health and body. When we sleep, our body and mind rest and recover from the day's activities. Men and women need no more seven or eight hours of sleep, while children need only nine or ten every night. If children don't get enough sleep, they can feel tired, they cannot focus and even get sick easily. Good sleep helps us improve memory, mood, and energy levels. To sleep well, it is important to have regular sleep, avoid using phones before bed and create a quiet environment. Drinking coffee or eating heavy food late at night can also make it harder to sleep. It's also best to avoid playing video games before bedtime, as these can make your brain too active and harder to relax. Remember, good sleep is a key part of a healthy lifestyle.
